Suppliers of Commercial Catering and Refrigeration Equipment

Blackburn College Higher Education, Blackburn

We are very proud to be associated again with Blackburn College and its quest to improve facilities for all its students and staff alike.

Further to the Design & Build of a five storey steel framed higher education centre consisting of specialist teaching space incorporating; learning resource centre, refectory & servery, lecture theatre, administration, IT and general teaching classrooms, an extension was recently added to the front of the building.

Having been involved in the first phase of Blackburn College HE building and supplying and fitting a new kitchen with servery areas and furniture within the refectory area, we were asked to revisit site to supply and fit a further servery area within the new HE Extension.

J.P. Commercial Kitchens supplied and fitted the front, granite topped counter, which was angled to suit the line of the bulkhead above it. In line with the brief from the college, only one item, an ambient show case was

requested for this counter. However, it consisted of a full line of lockable cupboards, giving ample, secure storage. J.P. Commercial Kitchens Ltd also supplied and fitted the rear Stainless Steel counter. The brief on this was to supply a counter, incorporating a small wash up sink, a lockable, undercounter three door fridge and a water boiler. The coffee machine was supplied and installed by Starbucks Coffee.

Suppliers of Commercial Catering and Refrigeration Equipment

The challenge on this project was a turnaround of two weeks from design to installation, which was highly appreciated by both the Design and Build company and the College.

JP Commercial Kitchens Ltd also supplied the tables and chairs within the refectory area to match the existing furniture previously supplied by us.

Both counters compliment the surrounding, relaxing area, where the students can have a coffee and a chat with either their colleagues or tutors.
